Pyramid Contracting
1108-A Lykes Lane
Irmo, SC

To Whom it May Concern:

It has been my pleasure to work with Pyramid Contracting on the 185,000 square foot warehouse building for the South Carolina Emergency Management Division for the State of South Carolina. As the Project Architect, the Owner tasked us with developing an emergency warehouse and administration building from an existing out-dated industrial factory in the Town of Winnsboro. This building is to serve as a hub for emergency management in the event of a hurricane, tornado or other natural disaster.

During the construction process, I found that Pyramid was professional in all aspects of business. We found that their attitude sought to serve the needs of the client, both in the product that they provided and their insights to keep the project on time and in budget. Their attention to detail served to make my job much easier as we worked together to solve issues that normally arise during any renovation project.

If given the opportunity to work with their company again, I would welcome their experience and abilities to the construction arena. Based on my experiences, I recommend their firm to all that have need of commercial construction services. I'm grateful for their service at EMD.

Sincerely,

CDA Architects

David R. Yensan
